Happy Holidays

'Twas the night before Christmas, and all through the house,
Our Engineers were busy, and kept an eye on the mouse.

With **Dave** at the helm, and **Kim** in the west,
John covers the middle and **Greg** all the rest.

Our Engineers are all over, the **US of A**,
Their ability to respond, is typically **ON THAT DAY!**

Located in **Canada** and **US**, we are **400** strong,
We have **31** Offices, and we all get along.

Our Engineers analyze damage, caused by hail, wind or fire,
From construction defects, to earthquakes, they never seem to tire.

Grain silos and railways, bridges and dams,
Complex construction, are included in our plans.

Both **Civil** and **Structural**, are **diverse** as a group,
Our **Geotechnical** talent, is part of the Loop.

Our Engineers are experienced, and the team is "real tight",
MERRY CHRISTMAS TO ALL , and *TO ALL A GOOD NIGHT!*
